**CELLULAR IMMUNE  
TOLERANCE SYMPOSIUM  
EXHIBIT + SPONSORSHIP  
PROSPECTUS**

The Stanford Cellular Immune Tolerance educational symposium is a two-day event that will highlight cutting-edge research and clinical studies of cellular therapy interventions for transplantation and autoimmunity. The symposium will provide participants with updated information about different cell therapy strategies including hematopoietic stem cell transplantation, T regulatory cell therapy, dendritic cell therapy, and modifying tissues for immune evasion. The review will utilize a variety of learning modalities including didactics, panel discussion, and audience response questions to facilitate meaningful interactions between expert faculty presenters and symposium participants.

# ABOUT US

The Stanford Center for Medical Education (SCCME) is a global leader in the promotion of lifelong learning among professionals in healthcare. As such, we advance patient and population health and promote innovation by planning and implementing accredited continuing education activities to enhance the professional development of healthcare teams both locally and regionally, in the San Francisco Bay Area and in the greater Pacific Region, as well as nationally and globally. To accomplish this mission we apply evidence and best practices from the education and implementation sciences to develop, accredit, and evaluate activities and initiatives designed to improve the skills, strategy, and performance of providers and healthcare teams and the delivery of patient care, ultimately with the goal of creating better health outcomes. By aligning our activities with the relevant competency frameworks, we support our learners as faculty, healthcare professionals, and respective teams in providing high-value care to their patients and the communities they serve.
