Sean M. Oser, MD, MPH, was diagnosed with type 1 diabetes just before starting college. Through medical school, graduate school, and residency, as well as through marriage, parenthood, and his professional career, he has learned to make diabetes work at each step along the way. His daughter was diagnosed with type 1 diabetes at age seven and, since then, he and his wife, Tamara Oser, MD, have discovered Children with Diabetes and other parent and family groups. CWD and its programs have helped motivate him to join the diabetes online community and to engage in diabetes research. He is currently Associate Professor in the Department of Family Medicine at the University of Colorado School of Medicine. He places a strong emphasis on providing patient-centered, team-based, comprehensive care. He is a proponent of harnessing human, community, and technology resources in providing high quality longitudinal care and enhanced communication with patients. Dr. Oser is active in diabetes research, including advanced diabetes technologies in primary care and the evolving role of social media in peer support.
